BOCCI 14 SERIES CHANDELIERS

AVAILABLE WITH 1, 3, 5, 7, 11, 14, 20, 26 OR 36 PENDANTS OR IN CUSTOM CONFIGURATIONS

CAST GLASS WITH BRUSHED NICKEL OR POWDER COATED WHITE CANOPIES

ITEM NO. LI93

The 14 Series are a family of low voltage pendant lighting products designed to be clustered in groups. Each individual pendant is an articulated, seamed, cast glass sphere with a frosted cylindrical void which houses a 10 Watt bocci long life xenon lamp or a standard halogen. Unlike most contemporary lighting, the 14 Series pendants are visually quite subtle in and of themselves – they do not dominate a room. Instead, the 14 Series is designed for clustering - gaining tremendous visual strength when multiplied – the effect being of many tiny candles encased in floating spheres of water. The light interacts with the imperfections and bubbles of the cast glass to make a visually rich halo of light. Cast glass is an organic process – imperfect by nature – so each piece produced is unique.

APPLICATIONS

Suitable for residential and commercial use. CSA, UL and CE approved. Popular applications to date include clusters over tables in residential dining rooms and restaurants, accessory lighting in living rooms, decorative lighting, linear configurations or clusters over bars and kitchen islands, and large chandeliers at building lobbies and other public spaces.

MATERIALS

Cast glass, blown borosilicate glass, braided metal coaxial cable, electrical components and a powder coated canopy in white or black.

Worldwide patents issued and pending. US patent # US D556,361 S
Made in Vancouver, Canada

PENDANTS: twenty six

CANOPY: white powder-coated rectangular canopy
1000mm (39.4") x 335mm (13.2")

LAMPING: 10w xenon or 1.8w LED

LENGTH OF COAX: determined by client: 30500 (100') standard maximum

INSTALLATION: jack connected (pendant lengths set during production)

MATERIALS: Cast glass, blown borosilicate glass,
braided metal coaxial cable, electrical components
brushed nickel canopy

WEIGHT: approximately 74kg (163.1lb)

TRANSFORMERS: integral

DESCRIPTION

14.26 is a random configuration of twenty six 14' pendants hung from a rectangular canopy. The drop lengths of the pendants are randomized between a client specified range of heights to variously cluster and scatter. The result is an ambient chandelier or field of light.

The 14' is an articulated, seamed cast glass sphere with a frosted cylindrical void that houses a low voltage lamp. Individual pendants are visually quite subtle, but gain tremendous strength when multiplied and clustered in large groups.

NOTES

- + Purchase replacement lamps online at www.bocci.ca/lamps
- + Unless otherwise noted when ordering, all chandeliers will be outfitted to be xenon compatible.
- + Note: As an alternative to a built-in transformer, Bocci recommends mounting transformers remotely in an easily accessible and hidden location for ease of long-term maintenance.
